

MISSION

SAVE ENERGY

Summer time energy efficiency can save you money, make your family more comfortable and help the environment.

Share your photos & win prizes!

When you email or share a photo of energy efficiency at your house you earn points. Be sure we can see your Energy Spy magnet number so we know who you are.

2 POINTS

Turn off your lights and fans at home when you leave the room.

1 POINT

Close the blinds and curtains during times of direct sunlight. This helps keep the summer sun's heat out.

1 POINT

Unplug your TV, gaming console or computer. Some equipment uses power even when it's turned off.

3 POINTS

Take shorter, cooler showers. Every gallon of hot water you use takes energy to heat.

2 POINTS

Keep your refrigerator door closed. Think about what you want before opening the door. Save your family a few dollars each month.

3 POINTS

This summer, turn up your air conditioner a few degrees. You can save 1-3% for each degree above 72.

2 POINTS

Change your air conditioner filter. Making sure the filter is clean saves money on your cooling bills and lowers maintenance costs.

2 POINTS

Check the temperature on your water heater. Set higher at 120 degrees.

2 POINTS

Wash your clothes with cold water. Unless you're washing cloth diapers, your clothes will be just as clean.

4 POINTS

Contact Columbia Water & Light for an energy audit. Inefficient houses can waste up to \$200 a year.
